

Marketing Campaign Performance Report

Developed By: Muhammad Taha Imran

Project Background:

- I have to analyze marketing performance data from **January 2024** to **January 2025** across all major advertising channels used by the business.
- The data covers **8 channels** and **20 campaigns**, along with about **\$1.36 million** in total ad spend and the resulting clicks, conversions, and revenue.
- The business needed a single, clear view of performance, since results were previously scattered across different platforms with no easy way to compare them.
- The goal was to identify which channels and campaigns performed best, uncover where budget was being wasted, and turn those findings into clear recommendations.

Data Overview:

- The dataset based on **7,965 individual records** includes daily marketing performance records from **January 2024** through **January 2025**, covering a full year of activity.
- It tracks **8 advertising channels** (Google Search, Google Display, Facebook, Instagram, LinkedIn, TikTok, YouTube, and Email) across **20** different campaigns.
- Each record includes key numbers like impressions, clicks, conversions, spend, and revenue, along with details like campaign type, age group, gender, device, and country.

Total Revenue

268M

Total Impressions

3M

Total Clicks

124K

Total Conversions

7.75x

ROAS

1.27%

CTR

3.65%

Conversion Rate

\$10.99

CPA

\$0.40

CPC

- The account spent **\$1.36M** in total and generated **\$10.54M** in revenue.
- Ads were shown **268M times**, resulting in **3M clicks** and **124K completed sales**.
- Every dollar spent returned **\$7.75** in revenue (**ROAS**), reflecting a strong overall performance.
- Out of everyone who saw an ad, **1.27%** clicked (**CTR**), and **3.65%** of those clicks led to a sale (**Conversion Rate**).
- On average, each sale cost **\$10.99** (**CPA**), while each click cost just **\$0.40** (**CPC**).

Performance Trends & Customer Journey:

- Spend stayed steady all year, but revenue and returns varied sharply by month, with **January, April, and June** performing best at over **10x** return, while August was the weakest.
- Of **267.6M** ad impressions, only **3.4M** people clicked, and about **123,700** of those clicks led to a sale; roughly 1 in 100 viewers click, and 4 in 100 clicks convert.
- The biggest drop-off happens right after the ad is seen, pointing to ad appeal or targeting as the key area to improve.

Campaign Performance:

- “**Loyalty Member Appreciation**” delivered the best return of any campaign, at **18.70x**, despite a relatively small budget.
- “**Retargeting – Cart Abandoners**” brought in the most total revenue, over **\$4.3M**, while still staying highly efficient at **12.69x**.

Campaign Name	Total Clicks	Total Conversions	Total Spend	Total Revenue	ROAS
Retargeting - Cart Abandoners	1124497	44950	\$344,593.68	\$4,373,192.72	12.69x
Summer Sale Kickoff	308127	13734	\$115,579.30	\$1,130,861.41	9.78x
Holiday Gift Guide	456263	16445	\$145,589.26	\$1,008,406.99	6.93x
Mid-Year Retargeting Push	199656	8270	\$59,327.37	\$811,540.42	13.68x
New Year Kickoff Sale	175793	8285	\$55,909.81	\$724,003.91	12.95x
Loyalty Member Appreciation	69345	3410	\$17,816.15	\$333,125.68	18.70x
Year-End Clearance	62150	3330	\$19,521.74	\$301,219.14	15.43x
Black Friday / Cyber Monday	103728	3600	\$56,000.50	\$788,114.11	5.14x
Total	3385598	123736	\$1,359,311.94	\$10,541,297.38	7.75x

- “**Mid-Year Retargeting Push**” and “**New Year Kickoff Sale**” also stood out, both returning well above **12x** on their spend.

Budget Allocation & Campaign Results :

- **Conversion** campaigns received the largest share of the budget at **35.6%**, followed closely by **Retention** campaigns at **31%**, while Awareness and Consideration campaigns made up the remaining share.
- “Loyalty Member Appreciation” delivered the highest return of any campaign, close to **19x**, followed by “Father's Day Promo” and “Year-End Clearance”.
- “Retargeting – Cart Abandoners” generated by far the most total revenue, over **\$4.3M**, well ahead of “Summer Sale Kickoff” and “Holiday Gift Guide”.

Channel Performance:

- **Email Marketing** is by far the strongest channel, costing just **\$2.72** per sale and returning **32.11x** on every dollar spent.
- **LinkedIn Ads** is the weakest channel, with the highest cost per sale (**\$174.80**) and the only negative return, at 0.31x.
- **Google Search** performs best among paid channels, with the highest click-through rate (**3.31%**) and conversion rate (**4.42%**).

Channel Performance							
Channel	Total Clicks	CTR	Conversion Rate	CPA	Total Spend	Total Revenue	ROAS
Email Marketing	2055027	2.37%	4.97%	\$2.72	\$277,623.31	\$8,913,874.42	32.11x
Facebook Ads	269938	1.34%	2.26%	\$42.72	\$260,781.81	\$545,670.31	2.09x
Google Display	428640	0.52%	0.98%	\$61.92	\$260,986.00	\$317,299.05	1.22x
Google Search	64685	3.31%	4.42%	\$44.70	\$127,930.66	\$239,698.34	1.87x
Instagram Ads	157619	1.04%	1.84%	\$53.20	\$154,450.34	\$191,972.93	1.24x
YouTube Ads	259088	0.59%	1.21%	\$37.13	\$116,745.05	\$164,332.01	1.41x
TikTok Ads	137671	0.88%	1.45%	\$53.61	\$106,956.83	\$151,672.22	1.42x
LinkedIn Ads	12930	0.50%	2.38%	\$174.80	\$53,837.94	\$16,778.10	0.31x
Total	3385598	1.27%	3.65%	\$10.99	\$1,359,311.94	\$10,541,297.38	7.75x

- **Facebook Ads** and **Google Display** drive the most traffic among paid channels but convert at a much lower rate than Email or Google Search.

Clicks, Conversions & Cost Efficiency by Channel :

- **Email Marketing** converts visitors into buyers more than any other channel, followed by Google Search, while Google Display converts the least.
- **Google Search** gets clicked on more than any other channel, meaning its ads are the most engaging to viewers.
- Among the paid channels (excluding Email, shown separately due to its much higher return), Facebook Ads and Google Search offer the best balance of cost and return, while Google Display has the higher cost per sale for the weakest return.

Age & Gender Breakdown:

- Customers aged **55–64** convert at the highest rate of any age group, though conversion rates stay fairly close across all ages overall.
- Marketing spend is split almost evenly between **women (49%)** and **men (48%)**, with a small remaining share going to unspecified gender.
- Since spend is balanced across genders but conversion is slightly stronger in the 55–64 age group, age is a more useful factor than gender for fine-tuning targeting.

Return by Customer Type & Age :

- **Returning customers** deliver a noticeably higher return (close to 9x) than new customers (around 6x), showing real value in customer retention.
- Customers aged **55–64** give the best return of any age group, at over 8x, while ages 25–34 give the lowest, around 7.2x.
- Together, these results suggest that keeping existing customers engaged, especially those in the 45–64 range, offers a stronger payoff than focusing heavily on acquiring new, younger customers.

Performance by Country:

- The **United States** drives the most clicks, conversions, and revenue by far, reflecting its larger overall market size.
- **Canada and Germany** deliver the strongest returns, both above 8x, slightly ahead of the other markets.

Performance by Country					
Country	Total Clicks	Total Conversions	Total Spend	Total Revenue	ROAS
United States	1745640	63857	\$708,071.88	\$5,419,325.72	7.65x
United Kingdom	478134	16728	\$184,947.70	\$1,409,623.56	7.62x
Canada	376457	14105	\$148,220.72	\$1,199,383.06	8.09x
Australia	304275	11084	\$123,816.92	\$948,489.90	7.66x
Germany	285786	10793	\$116,145.90	\$938,862.28	8.08x
France	195306	7169	\$78,108.82	\$625,612.86	8.01x
Total	3385598	123736	\$1,359,311.94	\$10,541,297.38	7.75x

- Performance is fairly consistent across all **six countries**, meaning no single market is underperforming or needs urgent attention.

Device & Geographic Reach:

Total Spend by Device

Conversion Rate by Device

Total Revenue by Country

- More than half of the marketing budget (**58%**) is spent on **mobile**, with desktop taking about a third and tablet the smallest share.
- **Desktop** users convert at a slightly higher rate than mobile or tablet users, even though mobile receives the most spend.
- Revenue is concentrated in **North America**, particularly the United States, with smaller but steady contributions from Europe and Australia.

Traffic Trend by Channel:

- **Email Marketing** drives far more clicks than any other channel throughout the year, peaking around **June** with over **340K clicks**.
- All other channels stay relatively flat and close together, showing much smaller and steadier click volumes by comparison.
- This confirms Email Marketing isn't just the most cost-efficient channel (it's also the biggest driver of overall traffic).

Seasonal Trends in Cost & Conversion:

- **Conversion rate** stays consistently higher than click-through rate all year, with both dipping slightly in **March and August**.
- **Cost per sale** rises sharply in August and September, reaching over **\$20**, before settling back down through the rest of the year.
- The August/September spike in cost lines up with a dip in conversion rate, suggesting that period was less efficient and may need closer review.

Key Insights:

- **The account earned \$7.75 in revenue for every \$1 spent**, though only 1% of ad viewers clicked and just 4% of clicks led to a sale.
- **Spend stayed steady throughout the year**, while returns varied sharply by month, with January, April, and June performing best and August performing worst.
- **“Retargeting – Cart Abandoners” generated the most total revenue** (over \$4.3M), while Loyalty Member Appreciation delivered the best return of any campaign (18.7x).
- **Conversion and Retention campaigns together received two-thirds of the total budget**, reflecting a strong focus on driving sales and repeat purchases.
- **Email Marketing is the strongest channel overall**, costing just \$2.72 per sale and returning 32.11x, while LinkedIn Ads is the weakest, losing money at 0.31x.
- **Google Search performs best among paid channels**, with the highest click-through rate and conversion rate.

Key Insights:

- **Customers aged 55–64 convert more often** and deliver the highest returns of any age group.
- **Marketing spend is split almost evenly between men and women**, so gender has little impact on results.
- **Returning customers are notably more profitable than new customers**, highlighting the value of retention efforts.
- **Mobile receives the most ad spend (58%)**, but desktop users convert at a slightly higher rate.
- **The United States generates by far the most revenue**, while Canada and Germany show the strongest returns among all six countries analyzed.
- **Cost per click and cost per sale both spike sharply in August and September**, aligning with a temporary dip in conversion rate.
- **Email Marketing also drives more overall traffic than any other channel**, making it the top performer in both efficiency and volume.

Recommendations:

- **Shift more budget from LinkedIn Ads and Google Display into Email Marketing**, since it delivers the strongest return and lowest cost per sale by a wide margin.
- **Pause or significantly reduce spend on LinkedIn Ads until its cost per sale improves**, as it is currently the only channel losing money.
- **Increase investment in retargeting and loyalty-based campaigns**, such as Retargeting – Cart Abandoners and Loyalty Member Appreciation, since both are already proving highly profitable.
- **Focus more effort on improving ad appeal and targeting**, since the biggest drop-off happens right after the ad is seen, not after the click.
- **Prioritize retention marketing**, such as loyalty offers and repeat-purchase campaigns, since returning customers consistently generate a higher return than new customers.

Recommendations:

- **Direct a slightly larger share of budget toward customers aged 45 and above**, especially the 55–64 group, who convert more often and deliver stronger returns.
- **Review and improve the mobile experience**, since mobile drives the most traffic but converts slightly less often than desktop.
- **Plan for higher costs in August and September** by adjusting budgets or timing campaigns around this period, since cost per click and cost per sale both rise sharply then.
- **Continue investing steadily across all six countries**, since performance is consistent and no single market is currently underperforming.
- **Maintain a smaller, supporting budget for Awareness campaigns**, since they serve a different purpose (building visibility) and aren't expected to drive direct sales.
